Item and Inventory Functionality

Admin

-Get any specific item detail

-Get all items list

-Get all items from any specific warehouse (company as well as outlets)

-Get any specific item offer detail

-Get all active item offer list

-Add item

-Update existing item

-Add packing type

-Add item category

-Add item subcategory

-Add item offer

-Update item offer

-Add items in warehouse (company as well as any specific warehouse)

-Update items in warehouse (company as well as any specific warehouse)

-Remove items in warehouse (company as well as any specific warehouse)

*   Normally admin will not add/update/remove items in outlet's warehouse - but in case back end adjustment needed

TD

*   TD won't have anything to do with items and inventory

Outlet

-Get any specific item detail

-Get all items list

-Get all items from own warehouse - yet to build this functionality

-Get any specific item offer detail

-Get all active item offer list

*   Outlet cannot add/update/remove items from their own warehouse also.

         Outlet's warehouse inventory will be updated by "purchase/sell" operations only.
